**Re: Status of SPCC Screening Inspection for CRC Industries, Inc. (SPCC Case Number PA-08-006) located in Warminster, Bucks County, PA**

Dear Sir or Madam:

On April 2, 2008, representatives from the U.S. Environmental Protection Agency (EPA) conducted a multimedia screening inspection of the CRC Industries, Inc. facility located in Bucks County, PA. This facility is a non-transportation-related onshore facility, storing oil in excess of 1,320 gallons total aboveground and/or 42,000 gallons total underground (excluding completely buried containers meeting all requirements of 40 CFR §§ 280 or 281). Therefore, it is subject to all the requirements of the Oil Pollution Prevention Regulations under Title 40, Code of Federal Regulations, Part 112 (40 CFR § 112).

The multimedia screening inspection performed on April 2, 2008, collected only basic information, which describes the facility's oil storage capabilities. A full SPCC inspection may take place in the future. In the meantime, EPA encourages the facility to prevent and control oil spills through compliance with the Oil Pollution Prevention Regulations found at 40 CFR § 112. The following documents are included to assist the facility through this process:

- Spill Prevention, Control and Countermeasures Information Guide (November 2004)
- Federal Register - 40 CFR Part 112
- Spill Prevention, Control and Countermeasures Summary Sheet
- Spill Prevention, Control and Countermeasures Guide (October 2002)

Please note on July 17, 2002, revisions to 40 C.F.R. Section 112 were published in the Federal Register. A final rule to amend the SPCC rule was signed by EPA's Administrator and was published in the Federal Register on December 26, 2006. This final rule is effective February 26, 2007. The compliance date for owners and operators to prepare or amend and implement SPCC plans is currently July 1, 2009. Please be aware that facilities existing prior to July 17, 2002 must update their current SPCC Plan, and if a SPCC Plan is not currently in place, develop a Plan according to the July 17, 2002 regulations immediately.

Should you have any questions concerning this matter, please feel free to contact Lori Miller at (215) 814-3225. Please refer to the above case file number on any future correspondence or when contacting Ms. Miller. All information concerning this case file will be maintained in this office for a period of five (5) years.

We appreciate your oil spill prevention practices, and we continue to urge you to make spill prevention a priority in your organization.

Sincerely,

Joan Armstrong, Chief  
Oil and Prevention Branch
